

MATRIX ENTERPRISE™

FOR ENERGY SECTOR APPLICATIONS

CONTACT LIFECYCLE MANAGEMENT FOR THE ENERGY SECTOR

Companies who are leaders in the development and distribution of energy resources are facing a tremendous amount of consumer, environmental and regulatory demands that all put pressure on the contract management process. The multitude of players in both upstream and downstream operations require companies to have full visibility into the governing terms and conditions that manage the entire operational value chain and the associated rights and obligations afforded to each participant in the process.

Achieving efficient operations is key objective for most small to medium-sized companies involved in the exploration and distribution of natural resources. CLM Matrix helps many leading energy companies accomplish these objectives by standardizing the regulatory compliance and audit procedures that accompany energy exploration, refinement and distribution. These procedures include employment agreements, property rights, equipment leases and vendor contracts that are key to maintaining efficient operations and reducing overall business risks.

Our Matrix Software solutions help increase visibility into expiring rights and obligations that improve the operational conversions of capital investments in major plant and equipment. This increased visibility improves the time required to complete financial audits and optimizes the residual value of these depreciable assets when they reach end-of-life based upon the negotiated contractual arrangements. Many of our clients see ROI by having all of their contracts in a centralized repository that enables the dynamic reporting against contractual provisions that impact operational efficiency.

KEY BUSINESS DRIVERS

Standardization: Address the need for contract process and structure standardization while lowering administrative and legal costs associated with establishing and managing strategic relationships.

Speed: Collapse contract creation and negotiation cycle times by up to 50% or more and reduce DSO with back-end integration with existing ERP systems.

Business Intelligence: Optimize buy or sell side contracts through increased transparency and deeper analysis of enterprise-wide contract data. Communicate best practice information & instruction from Legal, Business and Finance.

Governance and Risk Management: Reduce operating and regulatory exposure through system level enforcement of request-to-contract procedures and eliminate rogue and redundant contract versions that drive up contractual risk.

HOW MATRIX ENTERPRISE™ WORKS

ABOUT CLM MATRIX

CLM Matrix is the market leader in Contract Lifecycle Management (CLM) software solutions on Microsoft Office and SharePoint technology platforms. Our solution extends the functionality of traditional contract management software by adding features such as:

- Rule-based document creation
- Clause libraries
- Policy-based approval workflow
- Automated reminders and alerts
- Real time user defined reporting
- Integration with legacy enterprise software
- Contract compliance tracking
- Multi-language capabilities
- Support for global environments
- Fully configurable to specific process and document types without code (wizard driven)

MATRIX ENTERPRISE SOFTWARE IS:

- Flexible** – dynamic process and workflow modeling.
- Configurable** – dynamic data definition changes.
- Adaptable** – Hosted, SAAS, or perpetual licensing models.
- Extensible** – Integration with CRM, SRM and ERP systems.

CLM Matrix is a Tier 1 ISV partner running exclusively on the Microsoft Technology Platform. Our solution allows companies with Microsoft Enterprise Agreements to fully leverage their investment in Windows Server, SQL Server, SharePoint Server, Office and Visio Professional, Live Meeting, and SQL Reporting Services.
